LINOTYPE-HELL									
DRUM – CHROMAGRAPH (3300 and 3400)	SCSI + FW(A)	YES	YES	YES	YES	YES	YES	YES	YES

NOTES:

1. The LinoScan 1450 is the only scanner that is FireWire port compatible, all other FireWire connections are SCSI port only and will require a suitable FireWire Adaptor/Converter at additional cost.
2. The LinoScan 2650 only works via the SCSI port with a SCSI-to-FireWire converter but will work with Intel based Macs.
3. Most supported Mac platforms are G4 and G5 based only.
4. Saphir Hi-Res, LS 1800, LS 2200 only work with G4.
5. Some SilverFast features (Multi-Exposure, iSRD and HDRi) are not supported with any of the above scanners.
6. CPS can also supply SilverFast for other scanning products from a variety of manufacturers.

Please call CPS on 01242 285100 or e-mail sales@cpsnet.co.uk for further information and prices.
